

Iron / Steel / Special Application Furnaces

www.whiting.ca

Whiting has manufactured equipment for the primary metal industry since 1884 and electric arc furnaces since 1914.

Today, Whiting Equipment Canada provides the worldwide industry with a source for virtually all metallurgical equipment and systems involved in the melting, holding and transporting of both ferrous and non-ferrous metals.

Engineering and manufacturing services have been extended to also include equipment for the mineral fusion industries and for other special application needs.

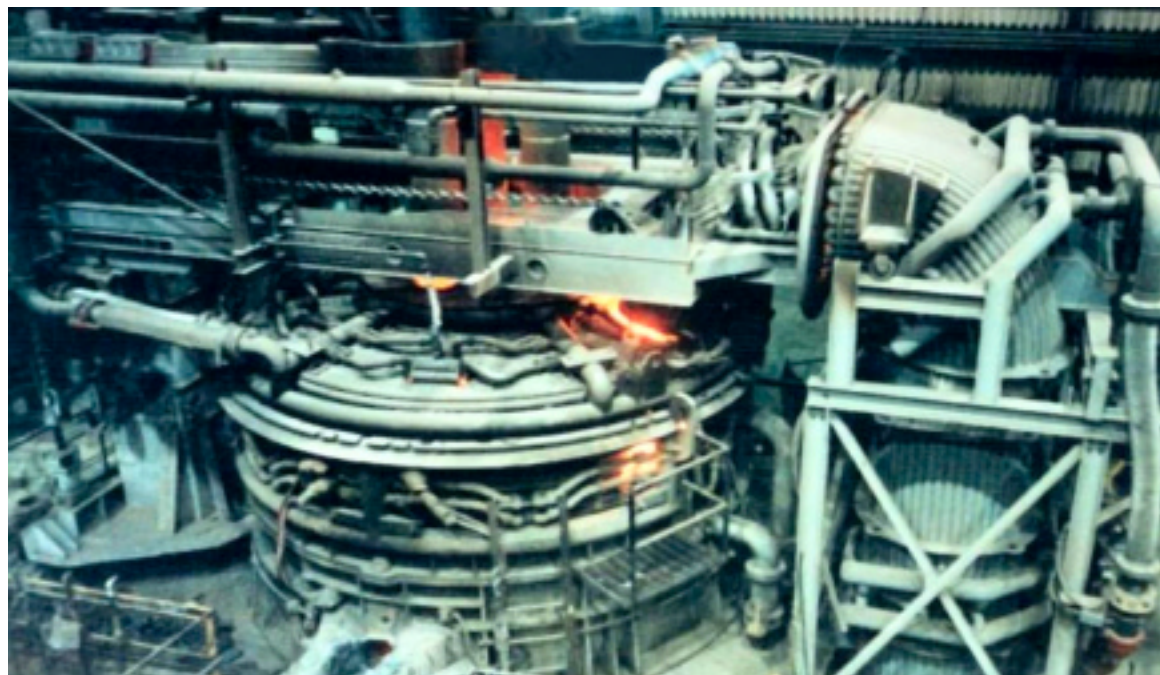

135 Ton eccentric bottom tap hearth for steel producing EAF

15 Ton foundry furnace

Water cooled ladle furnace roof

40 Ton special application steel furnace
